ABOUT ME

Software Engineer from Cairo, Egypt, with over 3 years of experience in software development. Graduated with a Bachelor's degree in Computer Science & Artificial Intelligence from Benha University in May 2026.

Skilled in backend development using PHP and Laravel, with experience in building scalable web applications and RESTful APIs. Proficient in SQL, Git, Cloud Computing, DevOps, Docker, Linux, and CI/CD. Passionate about learning new technologies and developing efficient, reliable software solutions.

EDUCATION

Benha University | 2022-2026

Senior Computer Science

Bachelor's degree in Computer Science & AI from Benha University
CGPA **3.6/4**

WORK EXPERIENCE

Informatique. | 7/2025 - 9/2025

Software Engineering Intern

Participated in the development and maintenance of web applications using PHP and Laravel. Collaborated with the development team to build backend features and RESTful APIs. Worked with Git, SQL, and Linux-based development environments. Gained practical experience in software development lifecycle, cloud technologies, and DevOps workflows.

ISchool | 2024 - 2025

Programming Instructor

Taught programming and computer science fundamentals to students of different age groups. Delivered interactive coding sessions and hands-on projects using modern teaching methodologies.

SKILLS

- Web development
- Cloud Computing
- System design & Analysis
- Software engineering
- AI Intgeation
- DB Management
- CMS Systems
- Instructor
- DevOps
- ERP Systems
- Problem Solving
- Large APIs

TOOLS & STACK

- Backend PHP/Laravel 11,12,13
- Cloud (AWS & AZURE)
- HTML5 & CSS3 & JS
- GIT & GITHUB & GITLAB
- Linux OS (Debian , Ubuntu)
- Remote server management
- Docker , GitHub Actions
- IDEs PhpStorm & WebStorm
- Clint APIs Postman , API dog
- Code editor VSC
- PHP , C++ , C , JAVA , DART , JS , C#
- Python , CNN , FastAPI
- CI/CD
- SQL , MySQL , MS SQL
- Domain DNS
- DDOs , CROS
- REST APIs
- CDN

PROJECTS

DevHub Community

A scalable backend system built for the DevHub Platform, designed to power a modern developer community through secure APIs, authentication, content management, and real-time interactions. The project follows clean architecture principles to ensure maintainability, scalability, and high performance. **repo [github](#) demo [link](#) APIs only**

System Admin Panel

Developed a comprehensive admin dashboard for managing and monitoring the entire platform. Implemented features for content moderation, user and system management, complaint handling, analytics and statistics dashboards, and full administrative control over platform operations. Designed to improve operational efficiency, security, and decision making through real-time insights. **repo [github](#) demo [link](#)**

e-learning platform

Laravel Storm is a comprehensive e-learning platform built with Laravel 12, designed to provide a seamless online education experience. The platform supports multiple user roles including students, instructors, and administrators, offering features for course creation, enrollment management, progress tracking, and more. **repo [github](#)**

Open Source Contributor – Piston Code editor tool

Contributed to the Piston open-source project, a high-performance code execution engine that powers online compilers and programming platforms. Collaborated with the open-source community by contributing code improvements, bug fixes, and enhancements through GitHub, following modern development workflows and code review practices. **repo [github](#) demo [link](#)**
